

VANCOUVER ABORIGINAL FRIENDSHIP CENTER VANCOUVER 1997

Problem: leaking and rusting metal roof, flaking coating on flashing, heat expansion \ contraction of the substrate leading to opening of seams and screws popping out.

Solution: A Function Coating System consisting of <u>RUST GRIP®</u> **Rust and Biohazard Encapsulation** primer coat to permanently seal in the rusting metal

SUPERBASE (HS)® Acrylic Caulking / Membrane to caulk seams and screws

<u>SUPERTHERM</u>® Ceramic Thermal Barrier Coating *Engineered to Repel Heat* Base Coat to insulate and stop heat expansion plus added UV protection

ENAMO GRIP® Low Maintenance Top Coat to provide a lasting impact resistant, low maintenance finish up to and including GRAFFITI

Eagle Specialized Coatings And Protected Environments | a Division of DW PEARCE Enterprises Ltd. (1979) Tel: (604) 576-2212 ° Email: info@eaglecoatings.com ° Web: www.eaglecoatings.com

Thermal Fire Corrosion Call Us for more information at 604-576-2212

<u>RUST GRIP</u>® on metal roof panels

SUPERBASE (HS)® on seams and screws

Eagle Specialized Coatings And Protected Environments | a Division of DW PEARCE Enterprises Ltd. (1979) Tel: (604) 576-2212 • Email: info@eaglecoatings.com • Web: www.eaglecoatings.com

Thermal Fire Corrosion Call Us for more information at 604-576-2212

SUPERTHERM® 1ST COAT

SUPERTHERM® provides the added environmental benefit of a reduced <u>HEAT ISLAND EFFECT</u>.

SUPERTHERM® 2ND COAT ENAMO GRIP® TOP COAT

ENAMO GRIP® ON FLASHING
